

Our commitment to providing the benefits of environmentally friendly products.

The color green has always held a place of high importance for Corle Building Systems. It has been the primary corporate color since our company's beginning. In recent years, however, "Corle Green" has come to represent the company's commitment to providing our customers with environmentally friendly products.

Corle Building Systems uses recycled materials in the manufacturing process. We also recycle 100% of the steel waste created during the manufacturing process. Recycling reduces costs, while conserving energy and natural resources.

In the construction industry, recent interest in recycling has been driven largely by the US Green Building Council's Leadership in Energy and Environmental Design (LEED®) rating system. The LEED rating system only promotes the use of materials with high levels of recycled content.

At the end of their useful life, about 88% of all steel products and nearly 100% of structural steel beams and plates used in construction are recycled into new products — an amazing reclamation rate!

ENVIRONMENTAL BENEFITS

- Enhance and protect ecosystems and biodiversity
- Improve air and water quality
- Reduce solid waste
- Conserve natural resources

ECONOMIC BENEFITS

- Reduce operating costs
- Enhance asset value and profits
- Improve employee productivity and satisfaction
- Optimize life-cycle economic performance

HEALTH AND COMMUNITY BENEFITS

- Improve air, thermal, and acoustic environments
- Enhance occupant comfort and health
- Minimize strain on local infrastructure
- Contribute to overall quality of life

Building trust in steel.™
